CLOUDCROFT IS GOING TO HAVE A BANK.

With Cement Sidewalks, Plate Glass Windows and Signs of Marked Down Garments, Opportune

Time is Here. Cloudcroft, N. M., Aug. 10 .- North Cloudcroft, not content with her new postoffice building, and five other new stores, all painted, one with plate glass windows in which are displayed signs that read: "This garment was \$10, now marked down to \$4.98," just like her city neighbors, and a concrete walk in front, is still putting on more airs and announces that she is going to have a bank; at which news all the summer visitors rejoice as they feel that it has been an imposition to ask the druggist and the other merchants to cash their checks which they have always so kindly done.

AFTER THE HONEYMOON

of the summer. The mercury was sizzling around 90, and the streets that wilted, dejected look that.

They used always to take a taxihad that wilted, dejected look that comes only with extreme heat.

"Put on your things-we'll go to a roof garden and get cooled off. It's insufferable here.' Helen assemed eagerly. She had been in all day and felt more than usual the

She hurried into one of her prettiest rowns. They had been out so little lately and she had so few chances to wear the many dainty gowns of her trousseau. The one she selected now was a white chiffon, very soft and sheer. She fastened a few hooks at the waist and neck, and then ran in to Warren for the unreachable ones in the center "Haven't you anything that buttons

in front?" he grumbled. "Buttons in front?" laughingly. "You know nobody wears gowns that button

"Well, then you ought to put these hooks where one can find them-and have them big enough. These devilish little things—you can't get hold of them. There," pushing her off his knee. "Now hurry 'up."

Hooking Up Her Dress.

She reached back and felt inquiringly along the line of fastenings. "Why, you haven't only hooked the lining!" Settling herself again on his lap. "The outside is still undone." lap. "The outside is still undone."

He muttered something something very strenuous under his breath.
"Now, don't swear," turning and kiss-

Helen fellowed with a sense of disappointment wholly out of proportion to the incident. Had he forgotten how they had always sought out that particular corner—even waiting for a table when it was crowded? And now he had indifferently chosen another place.

"Claret lemonade?" She nodded. Claret lemonade for her nd a Scotch highball for him was their usual order.

imperial army and navy; the surveil lance of the medical profession; the press, and the trades' unions. "Well, we got cooled off-didn't we?" details of the administration of laws, "Yes," she murmured, but with a and all local authority-including direct taxation-is left to the several states. It is provided by the constitution, however, that the Prussian milltary system shall be maintained in

German Constitution. The imperial German constitution, which has served as a basis for the existing Japanese constitution and for the nascent Chinese constitution, although it is concerned chiefly in separating the jurisdictions of federal and state authorities in a confederated government, differs radically in principle from the constitution of the United States, which has served as the model for the constitution makers of he German constitution, like the great American charter, is a system of compromises; but unlike the German constitution grants concessions the boat was being swept rapidly toand favors, but it is concerned chiefly with the business of creating a powerful machine for making the purposes of government effective. American constitution, on the other hand, is designed in theory to permit the people and the states to control the federal government, giving to the union, piwer over only such matters of legislation as require uniformity.

Resembles Our Constitution. The result is that the German constitution is much more specific in terms, and more nearly resembles a American state constitution of the kind generally adopted in the last 40 years. For instance, the German constitution directly and specifically gives to the empire the right absolutely to control all systems of transportation, and other public service utilities not of a strictly local character. The constitution in 1871 specifically directed that the railway rates should be immediately reduced.

One of the curious features of the constitution is that it provides that every attempt against the existence integrity, security or the constitution of the German empire is treason, and shall be punished in the several states according to the state laws. The further provision is made that treasonable

states against that state, would be beemed high treason, shall be deemed as treason against the empire; and that the deciding tribunal in such cases shall be the superior court of appeals of the three free towns, sitting at Lubeck. Thus the imperial German constitution entrusts the decision of cases involving the charge of high treason to the judges selected by the free citizens of the three republics of Hamburg, Bremen and Lubeck. In this respect republican Germany is ac-knowledged to be the superior of monarchial Germany.

Power of States.

If the German people in their individual states possessed the democratic privileges granted by the imperial conspitution, their political condition would not be nearly so bad as it is. But unfortunately the individual states possess great power, and in the great and all powerful state of Prussla, the people have little or no voice in government. As a matter of fact, in practice the imperial government is the inferior of the Prussian government. Tomorrow-The Kingdom of Prussia.
